Data Analyst | Junior Data Scientist | Python | SQL | Power BI | Machine Learning

Computer Science graduate with hands-on experience delivering 20+ data analytics and machine learning projects. Proven ability to analyze complex datasets, build interactive dashboards, develop predictive models, and transform data into actionable business insights. Ready to contribute my strong analytical, problem-solving, and technical skills as a Data Analyst or Junior Data Scientist.

EDUCATION

Bachelor of Technology in Computer Science Engineering

Cambridge Institute of Technology, Ranchi | Graduated: 2026 | Cumulative GPA: 7.92/10

WORK EXPERIENCE

ATLIQ TECHNOLOGIES

Jun 2025 – Aug 2025

Data Analyst Intern (Virtual) [Link](#)

- **Cleaned, validated, and transformed** insurance data using **Excel (VLOOKUP, Pivot Tables, and Power Query)**, preparing accurate datasets across **27K+ customer records** for analysis with audit-ready and documented quality checks for reporting workflows.
- Designed and deployed an interactive **Power BI dashboard** tracking **₹989M revenue**, customer acquisition, policy performance, and sales channels, enabling **KPI monitoring and reporting**, trend analysis, and **forecasting-driven business decisions**.

PROJECTS

Food Delivery Time Prediction [GitHub Link](#) [Live App Link](#)

Feb 2026 – Mar 2026

- Built an **end-to-end** Food Delivery Time Prediction system using **Python, SQL, and Machine Learning**, analyzing **10K+** delivery records and applying multiple regression models like **Random Forest, XGBoost** to predict delivery time based on operational factors like distance, traffic, weather, and courier experience, achieving up to **~0.78 R²** score.
- Developed and deployed **interactive forecasting & predictive analytics** using **Streamlit application** for real-time **ETA prediction**, integrating the **trained ML model** with feature inputs to support delivery optimization, **operational** planning, reduced manual estimation effort through automated ETA predictions generated from operational inputs.

Healthcare Data Analysis and Reporting [GitHub Link](#)

Apr 2026 – May 2026

- **Conducted SQL-based hospital data analysis** using **PostgreSQL**, analyzing patient and department-level data to identify **Urology** as the highest patient-volume department, supporting healthcare **operational insights and resource planning**.
- Performed **JOIN and CTE-based expense analysis and aggregations**, identifying Healing Touch Hospital with the **highest medical expenses (₹352,178.06)** and generating insights on hospital cost distribution and financial performance.

GitHub Portfolio: 20+ Data Analytics and Machine Learning Projects. [Link](#)

TECHNICAL SKILLS

Languages & Databases: Python, SQL, MySQL, PostgreSQL, SQLite

Analytics & Machine Learning: Power BI, Microsoft Excel, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Tools & Technologies: Git, GitHub, Jupyter Notebook, Visual Studio Code, Streamlit, REST APIs, BeautifulSoup, JSON, XML

ACHIEVEMENTS

- Solved **50+ Python** programming challenges and earned a **4-star SQL** rating on HackerRank, showcasing strong analytical thinking and database query optimization skills.
- Selected as **Head Coordinator** for college events with **1,200+** attendees, demonstrating teamwork, communication, planning, and project coordination skills.

CERTIFICATIONS

- [IBM Data Science Professional Certification](#) - IBM
- [Python for Everybody Specialization](#) - University of Michigan
- [Machine Learning with Python](#) - IBM
- [Data Analytics Bootcamp](#) - CodeBasics
