Data Science Aspirant | Research & Reporting | Python | ML | SQL | EDA | Power BI | MS Excel | EDA |

Analytical and detail-oriented Computer Science graduate skilled in data analysis, machine learning, and AI-powered analytics. Proficient in Python, SQL, Excel, and Power BI, with hands-on experience building predictive models, deploying ML applications, leveraging AI tools, and transforming data into actionable business insights. Over the past 2 years, I have completed 20+ projects across analytics, business intelligence, and machine learning, strengthening my ability to solve real-world problems through data driven solutions. Eager to contribute as a Data Analyst or Junior Data Scientist while continuously advancing technical expertise

EDUCATION

Bachelor of Technology in Computer Science Engineering

Cambridge Institute of Technology, Ranchi

Graduated: 2026 | Cumulative GPA: 7.7/10

WORK EXPERIENCE

ATLIQ TECHNOLOGIES

Jul 2025 – Aug 2025

Data Analysis Intern (Virtual) [Link](#)

- **Cleaned, validated, and transformed** insurance data using **Excel (VLOOKUP, Pivot Tables, and Power Query)**, preparing accurate datasets across **27K+ customer records** for analysis with stakeholder communication, documentation & reporting.
- Designed and deployed an interactive **Power BI dashboard** tracking **₹989M revenue**, customer acquisition, policy performance, and sales channels, enabling **KPI monitoring and reporting**, trend analysis, and **forecasting-driven business decisions**.

PROJECTS

Food Delivery Time Prediction [Github Link](#) [Live App Link](#)

- Built an **end-to-end** Food Delivery Time Prediction system using **Python, SQL, and Machine Learning**, analysing **10K+** delivery records and applying multiple regression models like **Random Forest, XGBoost** to predict delivery time based on operational factors like distance, traffic, weather, and courier experience, achieving up to **~0.78 R²** score.
- Deployed an **interactive forecasting & Predictive Analytics** using **Streamlit application** for real-time **ETA prediction**, integrating the **trained ML model** with feature inputs to support delivery optimization, **operational** planning, and improved customer experience.

Healthcare Data Analysis and Reporting [Github Link](#)

- **Conducted SQL-based hospital data analysis** using **PostgreSQL**, analysing patient and department-level data to identify **Urology** as the highest patient-volume department, supporting healthcare **operational insights and resource planning**.
- Performed **JOIN and CTE-based expense analysis and aggregations**, identifying Healing Touch Hospital with the **highest medical expenses (₹352,178.06)** and generating insights on hospital cost distribution and financial performance.

TECHNICAL SKILLS

- **Languages:** Python, SQL (MySQL, PostgreSQL)
- **Data Analysis:** Data Collection, EDA, Power BI, MS Excel, ETL
- **ML Libraries:** Scikit-learn, Pandas, Numpy, Seaborn

ACHIEVEMENTS

- Solved **50+ Python** programming challenges and earned a **4-star SQL** rating on HackerRank, showcasing strong analytical thinking and database query optimization skills.
- Selected as **Head Coordinator** for college events with **1,200+** attendees, demonstrating teamwork, communication, planning, and project coordination skills.

CERTIFICATIONS

- [IBM Data Science Professional Certification](#)
- [Machine Learning with Python](#)
- [Data Analytics Bootcamp](#)
